

What is ASF?

It is a deadly disease that kills pigs. If ASF is contracted on a farm, all the animals are culled (or die) without reimbursement (meaning farm possibly closing down, all jobs lost etc)

No pork products allowed (food or other)

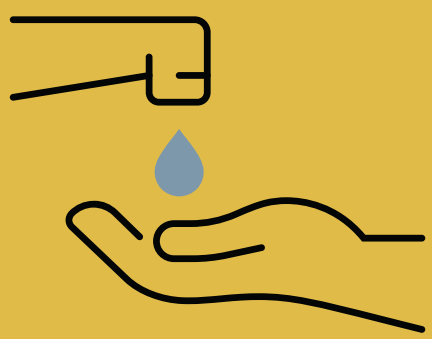

Shower before entering unit

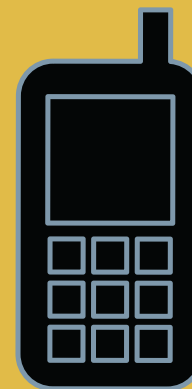

No personal clothes or jewellery past showers

Only work clothes inside unit

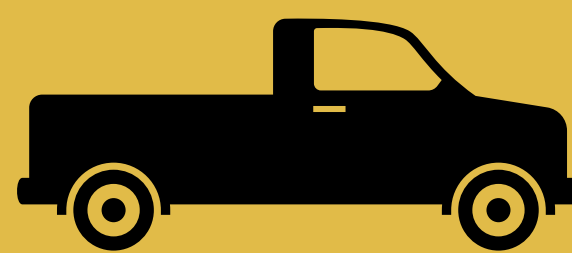

Wash hands regularly

Disinfect cellphone before entering unit

Disinfect gumboots before and after leaving buildings

All vehicles need to be disinfected before entry

How do pigs get infected with ASF?

People have it on their clothes or shoes, on vehicle tires or on food (humans do not get sick from ASF, but carry it to pigs)
